

MUBASHIR ASIF

MECHANICAL ENGINEER

CAREER OBJECTIVE:

Experienced Project Manager with hands-on experience in planning, executing, and delivering oil & gas projects, including well construction projects for Dar Petroleum Operating Company (DPOC). Proven ability to manage the complete project lifecycle, including project planning, scheduling, budgeting, resource allocation, procurement, contractor supervision, risk management, stakeholder coordination, quality control, and HSE compliance.

PROFESSIONAL EXPERIENCES:

PROJECT MANAGER

DAR PETROLEUM OPERATING COMPANY

FROM SEPT 2023 – PRESENT

DAR Petroleum Operating Company (DPOC) is a major Oil & Gas operating company in South Sudan, engaged in the exploration, development, production, processing, and transportation of crude oil from Blocks 3E & 7E in the Melut Basin. DPOC operates as a consortium comprising China National Petroleum Corporation (CNPC), PETRONAS, Nile Petroleum Corporation (Nilepet), SINOPEC, and Tri-Ocean Energy.

Responsibilities:

- Led planning, execution, and delivery of oil well construction projects (ALENI & NOAH, EZRA, NELSCO, and GPOC) for Dar Petroleum Operating Company (DPOC), ensuring adherence to scope, schedule, and budget.
- Acted as the primary liaison between PETROMAN and DPOC, maintaining effective stakeholder communication across all project phases.
- Managed full project lifecycle including resource allocation, procurement coordination, contractor supervision, and risk management for multiple field projects.
- Developed and monitored project schedules, budgets, and progress reports to ensure timely and efficient project delivery.
- Enforced quality control measures and HSE standards in line with oil & gas industry regulations and best practices.
- Handled procurement activities including material planning, vendor coordination, and timely sourcing of equipment to support uninterrupted project execution.

Achievements:

- Successfully delivered multiple well construction projects within defined timelines and operational requirements.
- Improved coordination between engineering, procurement, and construction teams, enhancing project efficiency and communication.

CMMS ENGINEER:

INVOTYX

July 2025 – PRESENT

Invotyx operates as a strategic outsourcing and engineering support partner for international organizations, including collaborations through RINA, delivering services for major clients such as ADNOC (UAE). The company focuses on compliance with international standards, digital transformation, and innovation in asset integrity and maintenance management within the oil & gas sector

Responsibilities:

- Lead the implementation and management of CMMS platforms aligned with Risk-Based Inspection (RBI) methodologies.
- Integrate RBI data into CMMS systems (SAP PM / IBM Maximo), ensuring accurate asset hierarchy, equipment criticality, and corrosion loop mapping.
- Coordinate with inspection and maintenance teams to maintain risk rankings, damage mechanisms, and inspection intervals.
- Ensure compliance with international standards such as API 580/581 for RBI processes and documentation.

Achievements:

- Successfully implemented and optimized CMMS aligned with RBI methodology, enhancing asset data accuracy, system reliability, and maintenance planning efficiency across critical equipment.
- Integrated RBI data into SAP, ensuring accurate asset hierarchy, equipment criticality, and corrosion loop mapping, resulting in improved inspection planning and compliance with API 580/581 standards.

ASSET INTEGRITY ENGINEER

SOFTOO

AUG 24 – JULY 25

Softoo is a global digital engineering and IT services company headquartered in London, with a strong operational presence in Pakistan. The company delivers advanced solutions in software development, artificial intelligence, and data analytics, supporting industries such as oil & gas, energy, and infrastructure.

Responsibilities:

- Assign and manage equipment, instrument, and piping tags in compliance with industry standards, ensuring full traceability and consistency across asset registers and systems.
- Implement asset labeling and data management strategies to enhance visibility, accuracy, and accessibility of asset information.
- Apply machine learning and data analysis techniques for asset condition monitoring, anomaly detection, and predictive maintenance support.
- Perform asset data validation and ensure alignment between P&IDs, tagging systems, and engineering documentation to maintain data integrity throughout the project lifecycle.

Achievements:

- Improved asset data accuracy by aligning P&IDs, tagging, and engineering documentation.
- Enhanced condition monitoring through ML-based anomaly detection and predictive maintenance support.

EDUCATIONAL CREDENTIALS:

DEGREE/CERTIFICATION	UNIVERSITY/INSTITUTE	YEAR OF PASSING
Bachelors in Mechanical Engineering	UET TAXILA	2023
FSC Pre Engineering (HSSC)	Model Science College Wah Cantt	2019
Matriculation	Sir Syed College Wah Cantt	2017

PROFESSIONAL SKILLS:

CORE SKILLS

- EPC & Project Procurement | Construction Procurement | Technical Purchasing | Tendering & Bid Evaluation
- Vendor & Supplier Management | Contract Administration | Commercial Negotiation | Cost Optimization
- Equipment Sourcing | Supplier Expediting | Contractor Coordination | Stakeholder Management

ENGINEERING & PROJECTS

- Project Engineering | Project Execution | Mechanical Design | Maintenance Planning | Asset Integrity
- QA/QC | HSE | RBI | API 580/581 | P&IDs | Technical Documentation

SOFTWARE & SYSTEMS

• AutoCAD | Creo Parametric | SAP PM | IBM Maximo | CMMS | Primavera P6 | AVEVA | SmartPlant

EXTRACURRICULAR ACTIVITIES:

Cricket	Podcasting	Badminton
Travelling	Vlogging	Drama Club
Stamp Collecting	Reading Newspaper	Welfare work
